Range : St. James

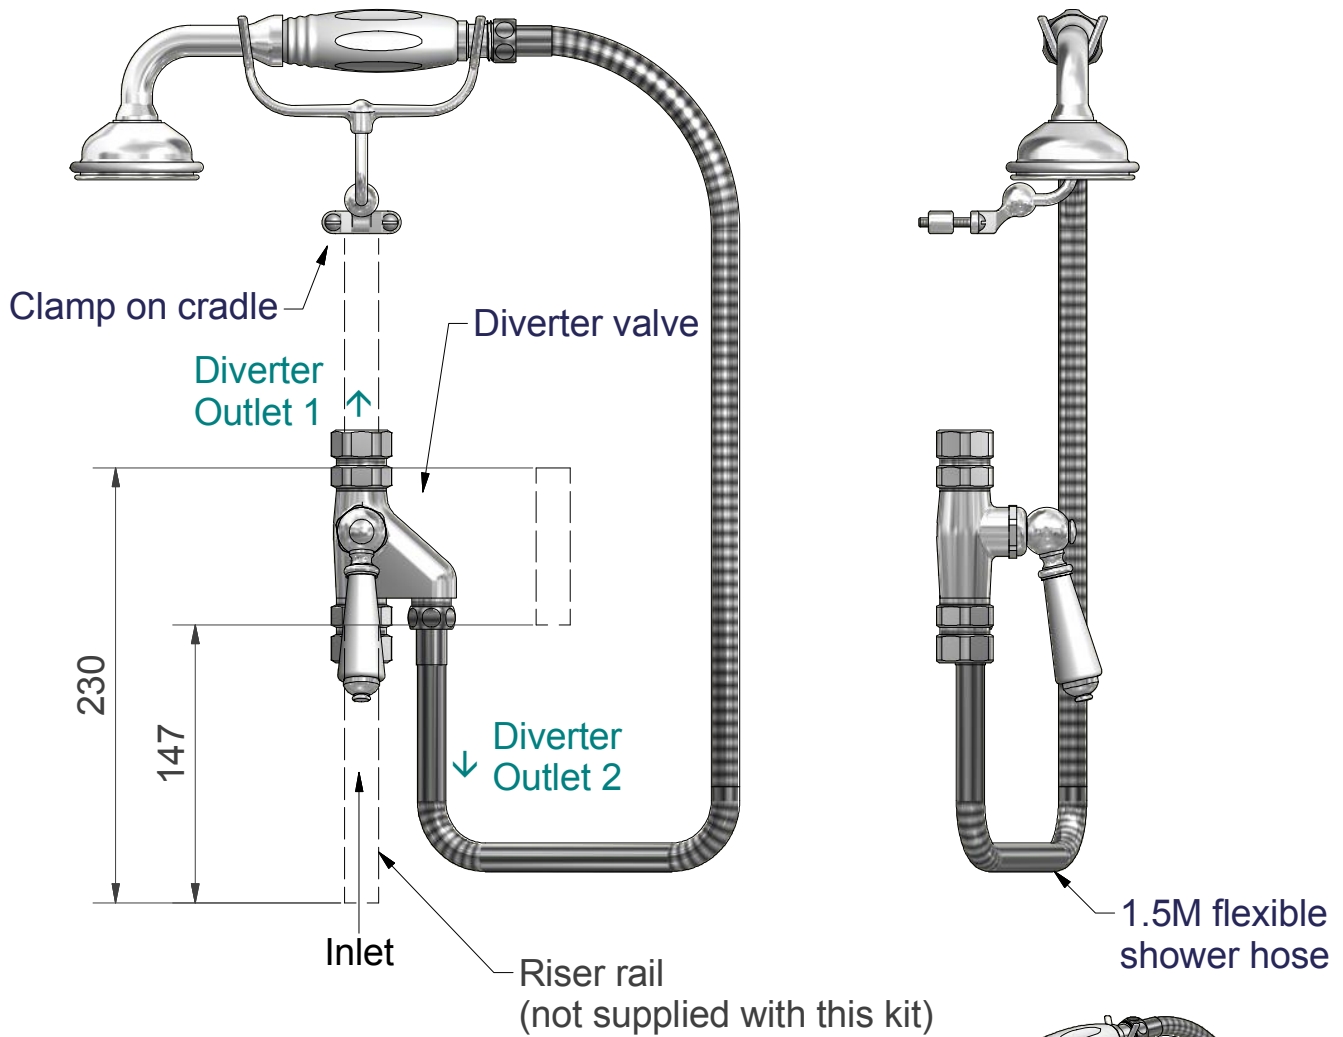

Product Code : SJK680

Description : 18mm Diverter Valve

Date : June 2015

Unless otherwise stated, all dimensions shown in "mm".

Product shown with "London Lever",
see our website or brochure for
other handles.

We recommend cutting 230mm from riser to position diverter at a suitable height, from this 230mm length then cut 147mm to use between the diverter and the shower valve. (These sizes can be amended to suit individual preferences).
